

Application Architecture Consultant

[Apply Now](#)

Company: 700Apps

Location: Riyadh

Category: computer-and-mathematical

We are a leading provider of full-scale digital transformation solutions and technology consultancy services established in 2012 in Saudi Arabia, UAE & Egypt. we are hiring for one of the most prestigious organizations in Saudi Arabia & seeking a highly motivated individual with exceptional interpersonal skills to join our team.

700Apps is seeking a highly skilled and experienced Application Architecture Consultant to join our team. As an Application Architecture Consultant, you will be responsible for designing and implementing application architectures that align with business goals and meet client requirements. You will collaborate with cross-functional teams to identify technology solutions, provide technical guidance, and ensure the scalability, performance, and security of applications.

Responsibilities:

Conduct a comprehensive analysis of existing application architecture, identifying areas for improvement, modernization, and optimization.

Develop and implement a strategic roadmap for application architecture modernization, outlining clear objectives, milestones, and deliverables.

Evaluate emerging technologies, frameworks, and tools to recommend the most suitable solutions for modernizing the application stack.

Design robust, scalable, and secure application architectures, documenting architectural decisions, patterns, and best practices.

Collaborate closely with cross-functional teams including development, infrastructure, security, and operations to ensure architectural alignment and smooth implementation.

Provide technical leadership, guidance, and mentoring to development teams, promoting architectural best practices and fostering a culture of innovation.

Identify performance bottlenecks and implement optimizations to enhance application performance, scalability, and reliability. Ensure that modernized application architectures comply with security standards, regulations, and industry best practices, proactively addressing security vulnerabilities. Drive continuous improvement initiatives to evolve and refine application architecture practices, keeping abreast of industry trends and emerging technologies.

Identify and evaluate technology solutions, frameworks, and tools to support application development and integration

Collaborate with stakeholders to gather and document system requirements, including functional and non-functional requirements

Provide technical guidance and support to development teams, ensuring adherence to best practices and industry standards

Perform code reviews and provide feedback to ensure quality, scalability, and maintainability of application code

Develop and maintain architectural documentation, including system design, diagrams, and specifications

Monitor and evaluate the performance and security of applications, identifying areas for improvement and implementing necessary enhancements

Stay up-to-date with emerging technologies, trends, and best practices in application architecture and software development

Requirements

Bachelor's degree in Computer Science, Software Engineering, or related field

Minimum of 8 years of experience in application architecture, design, and development

Proven experience in designing and implementing scalable and secure application architectures

Strong knowledge of software development methodologies, frameworks, and tools

Excellent analytical and problem-solving skills

Ability to communicate complex technical concepts to non-technical stakeholders

Experience working with cross-functional teams and ability to collaborate effectively

Knowledge of cloud computing platforms (e.g., AWS, Azure) is a plus

Relevant certifications (e.g., TOGAF, AWS Solutions Architect)

Proficient in programming languages such as .NET, Java, SQL, and C.

Experience in Agile methodology.

Experience in globally recognized best practices such as ISO and OWASP.
