## Department Information

The Heart Institute at our client hospital is a tertiary cardiac care delivery center with international standards of excellence. With its four clinical sections of Adult Cardiology, Pediatric Cardiology, Cardiac Surgery and Cardiac Surgical Critical Care, the Heart Institute is fully capable and committed to meeting the growing needs of the Kingdom and its people for all types of cardiovascular diseases thereby minimizing, if not totally eliminating referrals abroad, through team-oriented, evidence-based practice by the use of advanced informatics systems, cutting-edge research and advanced education. The Congenital Heart Program of the Heart Institute is renown worldwide with its unmatched quality care in pediatric cardiology and pediatric cardiac surgery. Adult cardiac care program encompassing adult cardiology and adult cardiac care surgery provides cardiac care treatment to high risk patients with the most complicated diseases not available anywhere in the region. At this Heart Institute, numerous catheter-based interventional procedures and surgical operations are performed on a daily basis from simple repair of a heart anomaly to the most complex and rare cardiac malformation in neonates, infants, children and adolescents. Multidisciplinary teamwork has been the key element in producing the best outcomes better than international standards. Prior to offering a permanent (1-2 years) contract, the hospital may invite doctors for a one-month locum. This provides an opportunity to visit the hospital, check out the department, and see Riyadh and Saudi Arabia. This gives you the time to decide if all your critical needs and desires such as geography, income potential, practice style, administrative agendas, and community profile line up with your long-term goals.
