A minimum of 3-4 years post-specialty certification experience in the specialty area in a mid-to large-size hospital in North America, Western Europe, or Australia/New Zealand.

Department Information

The **Department of Pathology and Laboratory Medicine** at our client hospital provides a broad range of clinical services and endeavors to offer the highest quality testing using State-of-the-Art Technology. A professional multinational team strives to give analytical data of the highest caliber that will help in the diagnosis and treatment of disease.

The laboratory is an integrated clinical and pathological service firmly rooted in the concept of quality care underscored by external peer-review (CAP, AABB) and with a specific mandate in supporting intensive therapies such as cancer therapy, hematopoietic stem cell and solid organ transplantation, cardiac and other complex surgeries. The Department also provides the essential support for assisted reproduction both pre-implantation and perinatal medicine.

Prior to offering a permanent (1-2 years) contract, the hospital may invite doctors for a one-month locum. This provides an opportunity to visit the hospital, check out the department, and see Riyadh and Saudi Arabia. This gives you the time to decide if all your critical needs and desires such as geography, income potential, practice style, administrative agendas, and community profile line up with your long-term goals.
