

Disaster Recovery Site Engineer

[Apply Now](#)

Company: Saudi Networkers Services

Location: Saudi Arabia

Category: computer-and-mathematical

Job Description :

Manage and maintain disaster recovery infrastructure and systems at designated DR sites, including servers, storage, networking equipment, and backup solutions.

Monitor the health and performance of DR services and infrastructure, proactively identifying and resolving issues to ensure readiness for disaster recovery scenarios.

Coordinate with vendors and service providers to procure, install, and configure hardware, software, and services necessary for disaster recovery operations.

Conduct regular testing and validation of DR plans and procedures, coordinating with internal teams and external stakeholders to ensure successful execution.

Provide technical support and guidance to internal teams during DR exercises and actual incidents, assisting with the activation of recovery procedures and troubleshooting technical issues.

Collaborate with IT operations, security, and business continuity teams to review and update DR plans and procedures based on changes in infrastructure, technology, or business requirements.

Document DR service configurations, procedures, and best practices, ensuring that documentation is accurate, up-to-date, and accessible to relevant stakeholders.

Participate in incident response activities related to disaster recovery, including root cause analysis, post-incident reviews, and implementing corrective actions to prevent recurrence.

Stay informed about emerging technologies and best practices in disaster recovery and business continuity, recommending enhancements to existing DR strategies.

Contribute to the development and delivery of training programs and materials to educate internal teams on disaster recovery processes and procedures.
