## Senior Traffic Engineer, Saudi Arabia

[Apply Now](#)

Company: Linum Consult

Location: Saudi Arabia

Category: architecture-and-engineering

**Linum Consult's client is an established engineering services and consulting company currently seeking a Senior Traffic Engineer with a thorough understanding of traffic-related analyses and experience in the development of planning studies to join their team in Riyadh, Saudi Arabia.**

### **RESPONSIBILITIES**

Providing technical subject matter expertise in Traffic Engineering & Transport Planning to project team members and clients during all stages of design delivery

Supporting, reviewing, and providing expert input on project data collection to the project team

Providing technical assistance in the development of traffic models, network simulations, and adapting models to client requirements

Providing assistance in calculating trip generation, developing origin-destination matrices, and calculating and analysing traffic volumes

Supporting the project team in the preparation of drawings, including circulation and parking plans, signage, etc.

Preparing transportation and traffic impact study reports, documenting all findings, conclusions, and recommendations

Verifying that all applicable codes and engineering standard practices are being met

### **PROFILE**

Bachelor's degree in Civil Engineering, ideally with a master's degree qualification in Civil or Transportation Engineering

8 years' experience in transportation planning and traffic engineering

Proficient in transport/land use planning, traffic modelling, ITS, and other information systems

Excellent technical knowledge of traffic simulation software, such as SYNCRO, VISSIM, HCS, SIDRA, etc.

Good understanding of international engineering standards and codes

Fluent in English and Arabic, ideally with some French language skills
