

Solutions Architect - vEPC

[Apply Now](#)

Company: Saudi Networkers Services

Location: Saudi Arabia

Category: computer-and-mathematical

Job Description :

Collecting requirements from Customers (internal and external) for the design of and implementation of vEPC solutions in labs and customer environments.

Coordinating with PDUs, Product Managers and different Lab Environments to realize and implement solutions.

Understand 3PP requirements and capabilities in the design and implementation phase.

Coordinate with SAs from other domain areas e.g. SDN, IMS and Cloud on the designing of end to end solutions.

Crafting HLD & LLD designs for vEPC solutions.

Scope, design, define and plan for Infrastructure Architecture and system deployment and/or upgrade as well as integration of Packet Core Solutions for Cloud and non-cloud environments.

Participate in knowledge transfer, documentation and information sharing while staying abreast of new technology/technical areas.

Experience in designing and leading Proof of Concept Trials in the vEPC area.

Coordinating project execution with matrix organizations spread across different domains

and geographic regions.

Have good experience in delivering E2E Solutions within Packet Core Domain.

Have solid understanding of OpenStack, Networking and Virtualization.

Prepared to work within a Technology Driven Professional Services Organization.

Pro-actively drive improvements in the methods, processes, and guidelines within the customer organization or internally.

Acts as a leader/mentor in day to day operations to provide insights for less experienced colleagues.

Possess a strong consultative attitude and the ability to see the bigger picture.

Self-assertive and able to work independently and cooperate in teams, projects and networks to achieve results and the capacity to work under stress to deadlines.

Ability to travel.
